

IUCEE Annual Student Forum (IASF 2026)

💡 Theme: Empowering Students in an AI-Driven World **January 8 – 10, 2026 at GITAM University, Bengaluru Campus** (Held in conjunction with ICTIEE 2026)

👥 About IASF

The IUCEE Annual Student Forum (IASF 2026) provides a dynamic platform for students from higher education institutions affiliated with IUCEE, to showcase innovation, collaboration, and leadership. Conducted alongside ICTIEE 2026, IASF fosters student engagement in solving real-world problems while strengthening links between academia, industry, and the global IUCEE community.

💡 Theme 2026: Empowering Students in an AI-Driven World

IASF 2026 challenges students to harness the power of Artificial Intelligence and sustainable design to transform learning, communities, and the planet.

Four Signature Components :

💡 EduAIThon: Hackathon for Developing Personalized Learning Apps using AI

Teams of three students and one faculty mentor will design innovative AI-based tools for personalized learning on specific course topics. Over 30 hours, participants will apply creativity, coding, and pedagogy to prototype AI-driven learning experiences that make education more engaging and effective.

💡 Theme IUCEE Mentored Projects on Sustainability Solutions

Student teams working under mentorship from IUCEE's expert network to conceptualize and develop prototype design solutions addressing sustainability challenges relevant to their local contexts—bridging classroom learning with community impact. All mentored projects will be showcased. Best projects will be recognized.

👥 IUCEE Student Chapters Showcase

IUCEE Student Chapters from across India will present outstanding projects completed during 2025, demonstrating leadership, teamwork, and the spirit of continuous learning within their campuses. This is a celebration of grassroots innovation through the IUCEE ecosystem. Best Student Chapters will be recognized

Reports from Lehigh University Summer School Teams

Student teams who participated in the Lehigh University Summer School on Humanitarian Design and Sustainability Engineering (hosted at Agastya Foundation, Kuppam Campus from June 1 to 6, 2025) will share their project outcomes, field experiences, and design learning journeys, inspiring others toward socially responsible engineering.

Who Can Participate

- Students from IUCEE-partner institutions
- Faculty mentors guiding student teams

Why Participate

- Hands-on experience in AI and Sustainability Design
- Mentorship from global IUCEE experts
- Opportunities to network with educators and innovators
- Recognition and Certificates for top teams
- Direct engagement with ICTIEE 2026 international community

Organized By

IUCEE Foundation (India) | Indo Universal Collaboration for Engineering Education (IUCEE) | GITAM University, Bengaluru (Supported by Teaching and Learning Centers and IUCEE Student Chapters across India)

Registration Details

Pre Register by: November 15, 2025
